INTEGRITY TOOLBOX 2026

IntegrityDialogues

Bringing digital integrity to life

Integrity grows through conversation.

This practical guide help leadership teams, managers and employees build a shared understanding of integrity risks and opportunities in digital workflows.
Integrity principles come alive when they are actively discussed and challenged in practice.

Use them in: team meetings, leadership off-sites, compliance workshops, project kick-offs, AI-governance discussions

Conversation starters

- Where do digital systems influence decisions in our work?
- Which system outputs do we trust most, and why?
- When did someone last challenge a recommendation made by technology?

Reflection questions

- What assumptions are we making?
- Where is human judgement still essential?
- How do we preserve accountability?

Run a session — 30 to 45 minutes

1. **Set the context (5 min)**
   Choose a real process or decision where a digital tool plays a role.
2. **Talk through the conversation starters (15 to 20 min)**
   Capture examples and concerns.
3. **Reflect (10 to 15 min)**
   Identify where judgement, transparency and accountability need strengthening.
4. **Agree next steps (5 min)**
   One action, one owner, one follow-up date.
